WORK EXPERIENCE

Web Developer / 2M Engenharia

NOV 2023 - MAR 2024 / Freelance, remoto

After my experience at 2M Engenharia, where I gained valuable insights into the challenges of employee management, I decided to apply this knowledge to create my first project in the field. The system was designed to address the chronic issues identified, significantly improving organization, access, and efficiency in managing this data. Additionally, I implemented scraping functionalities for automatic integration with other company systems, making information sharing easier and more optimized.

Stacks:
TypeScript, NextJS, NestJS, Puppeteer, PostgreSQL, Google Cloud.

Administrative Assistant / Luxottica

AGO 2023 - SET 2023 / Salvador - BA

At Luxottica, I played a crucial role in training employees on a new system that the company was migrating to. My responsibilities included learning the system and teaching its operation to colleagues. I was responsible for creating training materials, conducting training sessions, and providing ongoing support to ensure effective adoption of the new system. This experience strengthened my communication skills and ability to facilitate learning within the team.

Administrative Assistant / 2M Engenharia

DEC 2022 - MAR 2023 / Salvador - BA

As an administrative assistant at 2M Engenharia, I was responsible for supporting in the management of employee onboarding and offboarding processes. My work primarily involved handling documents and data related to these operations. I contributed to organizing files, preparing reports, and maintaining employee records. This experience provided valuable insights that served as a foundation for future ideas to improve and optimize administrative processes within the company.
